

# METAL-TEC<sub>7</sub> 1400

## Factory Correspondence Training & Certification Course Exclusively for Law Enforcement, Correctional and Security Trainers

*Learn how to improve officer safety, reduce liability and possible law suits by implementing the METAL-TEC 1400. Now each officer in your department can conduct a more thorough search for concealed weapons on suspects in the field.*

The METAL-TEC 1400 is the Only *Silent Vibrating* Metal / Weapons Detector Designed For Law Enforcement and Corrections. Currently used by over 700 law enforcement agencies & facilities world wide! This course is exclusively for law enforcement, correctional and security trainers wishing to implement METAL-TEC 1400 within their department or facility. Each person completing the training course will become certified by the factory to train the members of their department. Training will cover all the features of the METAL-TEC 1400 and how to implement the METAL-TEC 1400 along with the standard hand search, allowing you to conduct a more thorough search for concealed weapons on suspects in the field.

*This course is a must for departments wishing to improve officer safety and reduce liability.*

### Topics covered in this training & certification course

- Locating metal/weapons which may have been overlooked by a conventional hand search
- Determining the density of metallic objects being detected (is it a gun, knife or razor blade)
- Determining the metal object's shape and size to help identify the object's threat level
- How to pinpoint the location of metal objects once detected
- How officers can effectively search opposite sex and juvenile suspects using minimal physical contact
- Locating weapons concealed behind smaller metal objects found in clothing (such as zippers and bra wires)
- How to locate nonmetallic objects using *probing and tapping techniques*
- Addressing the Issues of the " Terry Pat Down "
- How to eject objects out of suspect's pockets using the METAL-TEC 1400
- Proper testing and utilization of the METAL-TEC 1400
- Proper maintenance and battery replacement
- Proper implementation of the vehicle mounting kit and belt worn holster

Correspondence Course Fee: **\$69.00** per trainer

### The course includes:

- Training video on DVD (may be used when training your department's officers during roll call)
- Complete training curriculum manual (manual can be duplicated as hand outs for dept. training)
- Course Exam (must be completed, notarized and returned to factory)
- Trainers Certificate of Course Completion (certificates issued for a period of 2 years)
